

SEALERS

SEALERS

M20

- Premium Polyurethane, High-Solids Sealer.
- Very High Gloss
- Extremely Hard -Long Life
- Non Yellowing
- Chemical & Solvent Resistant
- Tintable with industrial tints

The toughest sealer in the Lustre Seal range - very high gloss and extremely hard. Suitable over Mastershield, Covacrete and other concrete (incl. Stamp/Stencil) and masonry surfaces in thoroughly dry conditions. Also ideal over polished concrete. M20 is a moisture curing single pack polyurethane. Volume: 5L and 20L Kits

UA20

- High Solids, Gloss Urethane Sealer
- High Gloss
- Extremely Hard - Long Life
- Non-Yellowing
- Chemical & Solvent Resistant
- Also As Anti Graffiti Coating

Used as a high gloss finish & advanced protection over Mastershield polymer flooring, Covacrete, Stampcrete, Stencilcrete and other concrete and masonry surfaces. Also ideal over polished concrete. Economy option. Volume: 10L Kit

M90

- Premium Epoxy Flooring Product
- Self Levelling
- 100% Solids - Solvent Free
- Low Odour
- Extreme Strength and Bonding
- High Clarity Clear
- Tintable

Two part product forming the premium quality base for the Mastershield Interior flooring system. May be tinted, flaked, and other decorative inclusions. Clear product that may be used to suspend objects, graphics or lighting for a novelty feature floor. INSIDE USE ONLY as product is not UV stable.

Volume: 5L and 10L Kits

M90 MV

- Medium viscosity
 - 100% solids
 - Not self levelling
 - Roller application
 - Ideal for flake floors
 - Used for coving between floor & wall
- M90 MV is mixed with M90 Part B

SEALERS

M50

- Economical Epoxy Flooring Base or Surface Primer
- Excellent Primer
- Opaque White - Tintable
- Very Good Coverage per Coat
- Chemical and Solvent Resistant
- Water Clean-Up
- Very Low VOC

A two pack Aqueous Epoxy that can be used as a primer or as a base for epoxy flooring. May be tinted (aqueous tints), flaked or sprayed in contrasting flecks. As a satin finish it may be overseal for a high gloss finish. Highly economical epoxy flooring. **INSIDE USE ONLY.**

Volume: 10L Kit

Part A - Green, Part B - Yellow

LustreSeal Waterbased Sealer

- Low Odour Waterbased Sealer
- Low Odour - Very Low VOC
- High Gloss
- Self-Crosslinking Polymer
- Water Clean Up

Ideal for internal with low odour and easy water clean up. Suitable for over Mastershield flooring or Covacrete DesignerCote or other porous concrete/ masonry/stone surfaces. Tintable with aqueous tints. May be used externally with additional water added (see tech data sheet)

Volume: 5L, 20L

LustreSeal Extended Wear Plus

- Hard wearing, high-solids sealer.
- Extended Durability
- Rough Surfaces or High Traffic Areas
- Fuel, Oil, Mould & Fungi Resistant
- High Gloss - High Clarity

Used for extended longevity over high traffic and rough finished concrete surfaces, or where a slip reducing additive has been used. High quality, gloss-finish with additives for resistance to mould and hydrocarbons. For best results, first prime with LustreSeal Superbond.

Volume: 5L, 20L

SEALERS

Acrylic Sealer

- All Round Concrete Sealer
- Durable
- Easy to Apply & Maintain
- Gloss Finish
- High Clarity
- Tintable

Used as a high quality, gloss protective finish over decorative, and other concrete & masonry surfaces. For best results, first prime with LustreSeal Superbond.

Volume: 5L, 20L, 200L

Superbond

- Key-Forming Same Day Prime Sealer
- Same Day - Moisture Tolerant
- Priming Sealer
- High Penetration & Adhesion
- Flexible

Ideal for Resealing primer for masonry and natural stone surfaces (for porous stone - test before use). Also suitable for resealing - provides essential flexibility between finish coats (See Reseal Guide). Must be over-coated finish sealer upon surface curing for suitable longevity. Volume: 5L, 20L & 200L

Matt Finish

- Surface Protection with Natural Matt Finish
- Natural Low Gloss Lustre
- Hard Wearing
- Stylish Alternative
- Tintable

Used as a natural low gloss finish for any decorative concrete or masonry surfaces. Very popular for internal floors and Stampcrete surfaces. Opaque white liquid that dries clear.

Volume: 20L

DT Same Day Sealer

- First coat or priming sealer
- Soft resin that allows green concrete to breathe
- Not intended as a second or final coat sealer
- Can be applied to green concrete
- Can be applied to suitably prepared older concrete

Same Day Sealer is recommended for sealing "green" concrete on the day it is poured and as a first coat prior to the use of Decorative Concrete Sealer or High Build Sealer.

Volume: 20L, 200L

SEALERS

DT Decorative Concrete Sealer

- Good all round sealer
- Good wear characteristics & viscosity
- Designed as a second coat sealer over Same Day Sealer
- Can be used for resealing
- Gloss finish

Decorative Concrete Sealer can be used as a second or final coat on stenciled, stamped, coloured or plain concrete.
Volume: 10L, 20L, 200L

Cover-tex & Duratex Sealer

- Designed for use on Cover-tex & Duratex respectively
- Formulated for use on spray on materials
- Should be applied on day of spray on application
- Can be used for both first and final coats

Cover-tex and Duratex Sealers are used exclusively for sealing Spray on Paving materials.

Volume: 20L, 200L

Colour Sealer

- Large range of colours
- Cost effective alternative to new pavements
- Two parts (Part A & Part B) mixed on site prior to use

Colour Sealer is primarily used to colour plain concrete however can also be applied over stenciled, stamped and coloured concrete.

Volume: 18L Part A
2L Part B
