

Specialists in Constructive Solutions

constructive solutions

CONCRETE REPAIR

Fosroc is active in repairing all types of concrete structures and protecting them from the further actions of corrosive elements which affect the reinforcing steel. We can therefore guide our customers through the process of diagnosis, repair and protection with a harmonised solution to provide long term durability.

Specialist contractors using Fosroc repair mortars, corrosion management, protective coatings and strengthening systems cannot only repair damage but prolong the life of the structure for many years beyond its design life.

GROUTS & ANCHORS

By utilising global experience and expertise, Fosroc grout and anchor solutions deliver some of the world's most innovative product range.

With exceptional flow, stability and strength characteristics, our grouts provide the best solution for high precision and critical applications, together with a wide range of cement and resin based anchoring systems.

WATERPROOFING

From basement to roof, Fosroc can assist you to achieve the best waterproofing solution for your project.

Fosroc offers one of the most comprehensive range of below and above-ground waterproofing product systems, manufactured to the highest quality standards backed by independent test certificates. Our wealth of experienced technical experts and specification managers will help you find the best system solution for your project from basement to roof.

Whether your structure will be affected by rainwater, groundwater or contaminants contained within the ground soil Fosroc can provide system solutions to meet these demands.

JOINT SEALANTS

Fosroc's range of joint sealants, manufactured to high quality standards, have long been respected by clients, designers and contractors providing long term durability to building structures around the world.

Whether the requirement is to prevent wind, rain, sound, water or aggressive chemicals from degrading your structure, or to provide an enhanced aesthetic finish then Fosroc is the manufacturer of choice assisting you with expert technical advice and guidance in selecting the correct sealant solution to meet your needs.

PROTECTIVE COATINGS

Fosroc offers a technical and innovative product range to protect structures in a wide range of environments and industries.

Whether the purpose is to protect the new construction or refurbishment of structures against aggressive influences such as water ingress, atmospheric carbonation, chloride ingress in marine environment or aggressive chemicals from degrading the structure. Fosroc can assist you to achieve the best protective coating solution for your project.

INDUSTRIAL FLOORING

The floor is the basis of the production process and therefore plays a major role in the maintenance of buildings, working conditions and hygiene. Production techniques are constantly becoming more advanced, and floor treatments increasingly have to meet very specific requirements.

Combining years of experience of flooring systems throughout the world with the market leading products, Fosroc offer complete flooring solutions from design to installation.

Fosroc offers a full range of construction chemical solutions, helping to protect structures throughout the world. Please refer to our brochures, which include:
