EMERGENCY PROCEDURES

If This Happens	Do This
For All Emergencies	Shut off engine and any electrical equipment and leave off. No smoking, naked lights or other sources of ignition in the immediate vicinity. Evacuate the immediate area; keep upwind. Check for spills or leaks. Send message to police and fire brigade. Tell them the location, material, UN Number, quantity and emergency contact as well as condition of vehicle and damage observed. Warn other traffic.
Tanker/Vehicle Accident	Carry out action under For All Emergencies. Avoid moving vehicle if movement could cause or increase spillage.
Spill or Leak	Spills are environmentally hazardous. NOTE: So as to ensure that no lasting environmental damage occurs, monitoring of the location may be required following any spillage. Carry out action under For All Emergencies. Wear chemical-resistant gloves and boots, and additional protective clothing appropriate to the product. Stop leak if safe to do so, e.g. reposition container or vehicle. Prevent spilled product from spreading or entering drains or water courses by banking with sand or earth. Absorb small liquid spills with sand or earth. Do not wash residues away with water.
Fire	Carry out action under For All Emergencies. For minor fire use extinguisher provided (Trained Personnel). For major fire (Emergency Services): Wear chemical-resistant gloves and boots, and additional protective clothing appropriate to the product. If safe to do so, fight fire with extinguishants appropriate to the HAZCHEM Code, if known (See HAZCHEM BOX on this card). Otherwise, use water fog or fine water spray, alcohol-compatible foam, or dry chemical extinguishant. Cool adjacent area with water fog or fine water spray. Prevent run-off from entering drains or water courses by banking with sand or earth. If unable to control fire, withdraw personnel from the area and warn against entry.

FIRST AID

Inhaled	If overcome by smoke or fumes, remove to a safe area. Apply artificial respiration if not breathing. Keep warm. Get to a hospital or doctor quickly.
Eye	Hold eyes open and flood with water. Get to a hospital or doctor quickly.
Skin	CONTAMINATION OF CLOTHING: Wash contaminated clothing with copious quantities of water.
Swallowed	Contact a doctor or Poisons Information Centre. Get to a hospital or doctor quickly.
Burns	Immerse or flood affected area with cold water for 10 to 15 minutes. Bandage lightly with sterile dressing. Treat for shock if necessary. Get to a hospital or doctor quickly.
